

Project Info: 93 BURLEIGH GARDENS

Progress Update

As a part of the Construction Industry we are aware of the impact it has on the environment globally. Plastic pollution is a major contributor for environmental issues. Plastic is incredibly versatile and long lasting and finds its way into every corner of our lives. Vast quantities are polluting the world, most of it is flowing in the ocean. The UK produces more plastic waste per person than almost any other country, and a huge amount of it is sent abroad, most of it going to countries that aren't equipped to handle it. Nearly 40% of total direct and indirect carbon emissions are due to building and building construction sectors combined. For the purpose of spreading awareness in our workforce, on the occasion of Earth Day on 22nd April, we did a workshop and a quiz thereafter. The workforce was made aware of the journey of plastic and its effects on the earth globally and how it can be mitigated on an individual level and as a site overall. This workshop was held on all current CMT sites..

Client: [Palmers Green Investments Ltd](#)
Architects: [Maith Design](#)
Structural Engineers: [JMS Group](#)
M&E Consultants: [BSEC Design](#)

On the occasion of Mental Health Awareness Week, the site also did a CPD on this year's theme- Loneliness. The workforce was made aware on the mental health conditions and where they can find help. We also gave ideas on how they can prepare their individual wellbeing plans for their own mental health.

Regular workshops and CPDs develop the knowledge of our workforce and CMT is diligent in working towards training and development of our employees and workforce.

CMT CONSTRUCTION
CMT Design and Construction Ltd has been in the construction industry for more than a decade delivering residential, commercial, hospitality, education, entertainment, and refurbishment projects all around London.
