

Project Info: 93 BURLEIGH GARDENS

Our Burleigh Gardens site has seen major progress. With the Structural Framing System (SFS) and oriel windows steelwork now installed, the building is gradually taking shape. The project also reached the topping out stage and now on average there are 30 people on site working towards the interior fitouts.

The interior designers are also developing the guestrooms design drawings which can be seen on the right.

We are implementing the Daikin's VRV 5 air conditioning system which is highly energy efficient and has lower Global Warming Potential (GWP) and reduces the CO2 impact greatly making it a sustainable option for the hotel.

We will also be giving a Modern Slavery training workshop on 29th July for our workforce on all of our sites.
