

Project Info: *LEE HIGH ROAD*

Progress Update

This five-story mixed-use project is swiftly progressing with the installation of the drainage and partition system on all floors and the completion of the roof coverings. The structural framework system (SFS) and all the windows are now in place and the external cladding has commenced. The project is working towards achieving exceptional Consider Contractors Scheme scores as well as the Excellent BREEAM Green Building certification credits.

In our efforts to engage the Lewisham community, we collaborated with the Construction Youth Trust to provide two local school leavers with work experience on a construction site. This resulted in Michael joining as a trainee at CMT Construction.
