

Project Info: *LEE HIGH ROAD*

Progress Update

Site Progress

External work at our Lee High Road project is progressing with the installation of CMS40 MF brick slip system provided by Cladmate Façade Systems. Insulation and single ply membrane on the roof are now completed which was followed up by the installation of the AOV system. The project is progressing internally with the installation of kitchens and tiling in the bathrooms.

Community Engagement

An open day was organized for the local community this month to share insights into the project, answering their questions and providing an up-close look at the progress. We also received an "Excellent" score from Considerate Constructors Scheme in our recent visit and are committed to showing respect to the community.

Client: Lee High Road Development Limited

Architects: Tone Architects

Structural Engineers: Rise Structural Engineering Ltd.

M&E Consultants: BSEC Design Ltd.
