

## Project Info: *25 TREGO ROAD*

### Project Update

Now we are into 2024, we are looking forward towards the completion of our project at 25 Trego Road. Our CMS50R insulated render is now complete on the exterior elevations which has been followed up with the installation of CMS40 MF Slip Brick Cladding Support System provided by Cladmate Facade Systems. The complex brick slip cladding to this project makes the detail challenging but very rewarding to us and our installation partner Thermoclad. We also recently took delivery of our aluminium rainscreen cladding panels which now have commenced installation at the top of the building.

### Healthy Eating Initiative and CPDs

At CMT we are committed to engage our workforce in different activities to support their wellbeing. A group presentation was organized this month for our workforce to educate them on healthy eating. The main aim of this activity was to ensure their good health and help them maintain a good work life balance and continue to earn. We also have recently commenced a new raft of CPD sessions both online and in our head office where staff and operatives can widen their knowledge. This month was "Safety in High Rise Buildings" and also the "Cladmate Cladding and the Building Safety Act".

CMT Design and Construction Ltd has been in the construction industry for more than a decade delivering residential, commercial, hospitality, education, entertainment, and refurbishment projects all around London.
